

FIGEAC AÉRO NORTH AMERICA AWARDED NEW CONTRACT IN THE UNITED STATES

FIGEAC AÉRO (FR0011665280 – FGA:FP), a leading partner for major aerospace manufacturers, today announced that FIGEAC AÉRO North America, was awarded a new contract by Textron Aviation Defense, LLC. The contract, for the manufacture of wing skins for the Beechcraft T-6 Texan II and AT-6 Wolverine aircraft, is valued at €5 million.

GLOBAL REACH, LOCAL PRESENCE

The contract encompasses machining and processing services performed in the production of wing skins for Beechcraft T-6 Texan II military training aircraft and AT-6 Wolverine light attack aircraft. The T-6 and AT-6 are designed and manufactured by [Textron Aviation Defense LLC](#), a [Textron Inc.](#) (NYSE: TXT) company. Textron Inc. is a multi-industry company known around the world for its powerful brands such as Bell, Cessna, Beechcraft, Pipistrel, Jacobsen, Kautex, Lycoming, E-Z-GO, Arctic Cat, Textron Systems, and TRU Simulation.

The awarded entity is the Group's Wichita-based subsidiary, FIGEAC AÉRO North America, whose large-scale light alloy machining and processing specializations were key in the receiving of this contract. Beyond industrial capabilities, the award illustrates the relevance of the local-to-local strategy, which the Group has led by establishing a strong presence in key aerospace industry hubs, ever closer to its customers.

STRONG POTENTIAL FOR FURTHER DEVELOPMENT

Because FIGEAC AÉRO is strategically located in the aerospace hub of Wichita near the customer, the agreement will be especially efficient, reducing costs and carbon footprint. The agreement makes use of existing capacity at FIGEAC AÉRO, requiring minimal investments and optimizing working capital.

Shane Torgler, General Manager of FIGEAC AÉRO North America declared: *“Establishing this Master Purchasing Agreement is not only a great opportunity to work with a great customer in Textron Aviation but also to strengthen our presence locally. We look forward to growing this statement of work to become a key supplier for Textron Aviation.”*

STEADY PROGRESS IN NORTH AMERICA TOWARDS PILOT 28 OBJECTIVES

Adding to the three wins on commercial and business jet platforms earlier this year¹, FIGEAC AÉRO North America continues to deliver profitable growth. As a key asset for the Group, it is spearheading the Group's steady progress in the sizable North American commercial and defense markets, where developments are pivotal to achieving the PILOT 28 objectives.

FIGEAC AÉRO estimates it has now secured over 36% and is therefore confident it will achieve its annual €80 to €100m new business revenue objective by March 2028.
