

## FIGEAC AÉRO SECURES ITS LONG-TERM PARTNERSHIP WITH SAFRAN AIRCRAFT ENGINES

FIGEAC AÉRO (FR0011665280 – FGA:FP), a leading partner for major aerospace manufacturers, announces that it has reached an agreement with Safran Aircraft Engines (SAE) to renew four major contracts and extend them for several years. The contracts concern LEAP engine parts, and their associated revenues total over €15 million annually.

### EXTENSION OF FOUR MAJOR CONTRACTS

This new agreement follows on from a number of recent developments between FIGEAC AÉRO and Safran Aircraft Engines (SAE), including the latest contract on military engine parts. It is therefore further evidence of trust between the two companies, enabling them to build on the existing relationship.

Four major contracts have today been renewed and extended until the end of 2030. They concern high value-added parts for the LEAP engines that power the A320 and B737 aircraft families. The agreement secures annual revenue of over €15 million (based on full-year 2024/25) and extends the average duration of these contracts by more than 3 years. FIGEAC AÉRO thus reaps the benefits of its efforts to maintain high levels of industrial performance and customer satisfaction.

### A CORNERSTONE OF THE PILOT 28 PLAN'S SUCCESS

This renegotiation not only extends the contracts concerned, it also provides long-term safeguards for the conditions under which FIGEAC AÉRO will be involved in the significantly higher build rates expected by the client on these programmes.

FIGEAC AÉRO sees its relationship with SAE as being one of the cornerstones of its PILOT 28 plan's success, having now largely secured its business portfolio and steadily developed it with new high volume and high value-added parts.
